Welcome to Hacker Boot Camp
=====
In order to prove yourself, you will need to
complete several objectives.

You will find these objectives by opening the
"Objectives" window using the toolbar or the (O)
key.

You can open your server's interface using the
"Interface" button on the toolbar or the (I) key,
and you have some manuals that can help you learn
the ropes.

Keep an eye on your track level and delete the
file labeled:
strategy.txt
from your system.
